

# VALMET SEMI - AUTOMATIC RIFLES

Three sleek modern arms from one of Finland's leading manufacturers. Built for sportsmen, military collectors and law enforcement agencies, the Models 62S and 71S have earned a reputation for reliability and accuracy with field-wise marksmen around the world. Now, the newest Model 76FS takes its place in the line. The M-62S chambers 7.62 x 39 Russian Short cartridges and the M-71S fires the potent U.S. caliber .223 (5.56mm)

M-76FS  
Cal. .223

M-62S  
Cal. 7.62 x 39mm  
Russian Short

M-71S  
Cal. .223

The new M-76FS Carbine features design elements of the M-62S and fires the .223 round. In addition, the M-76FS offers a rugged, tubular steel folding stock for optimum mobility. All three models provide sophisticated design and production advantages over the battle-tested Kalashnikov (AK-47) and the desert-tough Israeli Galil. Make your move to Valmet... and move up front with the professionals.

The distinctive VALMET Finnish semi-automatic rifles are imported exclusively by INTERARMS to cater to prime collectors of military semi-automatic rifles. The M-62S in caliber 7.62x39 and the M-71S in caliber .223 are manufactured to exacting military and sporting specifications by the well known Finnish firm of VALMET. These rare collectors items are available in limited quantities and availability cannot be guaranteed indefinitely.

The M-62S standard butt stock is constructed of tubular steel with a built-in compartment for cleaning equipment. An optional stock of quality European walnut is available upon request. On the M-62S, the rear peep sight has tangent adjustments for elevation to 600 meters. The front sight is adjustable for windage by opposing screws.

The hooded front sight is also equipped with a luminous flip-up post for low-light level shooting.

The latest addition to the VALMET line is the Model M-71S. The standard model is equipped with an ABS plastic resin stock. A special, select walnut stock is available as an option. The primary design feature of the M-71S is its precision stamped, steel receiver. This, along with its simplified take-down (involving only five parts), makes the VALMET M-71S the world's fastest and most efficient rifle to handle and service. The open rear sight is adjustable to 500 meters and the front sight is adjustable for windage. It is also equipped with a low-light level luminous flip-up post.

Standard performance for the 7.62x39 with 123 grain Full Jacketed bullet is 2070 F.P.S. Velocity with Energy of 2260 Ft. Lbs. (Data taken at 25 Meters)
