

LICE

Trijicon RMR™ Series

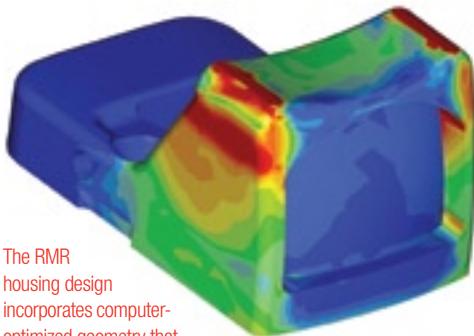

When precision is the only option, your best option is the Trijicon RMR™ Sight. Built to provide optimum red-dot visibility against the target, you can acquire and hit your target quickly and more accurately.

PRECISE

Smaller and lighter than any alternative, the Trijicon RedDot Sight is a reflex-style red dot sight with applications for all types of hunting and shooting. This versatile sight is right on target for handguns, carbines, rifles and shotguns.

The new Trijicon RMR (Ruggedized Miniature Reflex) has been introduced to match the legendary toughness of the Trijicon ACOG® (Advanced Combat Optical Gunsight).

The RMR housing design incorporates computer-optimized geometry that absorbs impacts and diverts stresses around and away from the lens. This design improves durability and eliminates the need for protective shields or covers.

It can be teamed up with the ACOG for the ultimate in fast target acquisition or precise aiming at extended distances.

The RMR offers two illumination configurations. One choice is an innovative LED (light emitting diode) insert that automatically adjusts for brightness in any lighting situation and ensures optimum visibility of the red dot against the target. The second option is a dual-illuminated, battery-free model featuring Trijicon fiber optics and tritium. The RedDot Sight continues to employ LED illumination.

Accuracy is further enhanced with adjustments for windage and elevation. And clarity is assured with the sight's ultra-clear, hard-coated lens.

POWERFUL

The RedDot Sight and LED RMR are powered by a long-life lithium battery that delivers 17,000 hours of battery life or more. The dual-illuminated RMR never needs batteries, thanks to its tritium and fiber-optic illumination.

STRONG

The RMR is designed with a rugged aluminum housing to be more than tough enough for virtually all military and law enforcement applications.

Built with a strong, glass-reinforced nylon-polymer body, the RedDot Sight delivers superior durability under the most extreme conditions.

Trijicon RMR™ (Ruggedized Miniature Reflex)

The World's Toughest Red Dot Sight

Developed to improve precision and accuracy with any style or caliber of weapon, the Trijicon RMR (Ruggedized Miniature Reflex) is designed to be as durable as the legendary ACOG.

The RMR is available in two illumination options: a battery-free model featuring Trijicon fiber optics and tritium and a LED version powered by a standard CR2032 battery.

Housed in rugged forged aluminum, the RMR is extremely tough yet lightweight. New easy-to-use adjusters with audible clicks allow for quick windage and elevation adjustments.

The new Trijicon RMR is tougher than any alternative and suitable for military, law enforcement and hunting applications.

Over 17,000 Hours of Battery Life

Single CR2032 battery can last up to 35,000 hours and up to 4 years in dark storage.

Bright LED Illumination

Auto-adjusts for brightness in any light situation.

RMR LED

Adjustable Elevation

Easily adjustable with out special tools. 1 MOA per click.

Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the reticle to available light conditions.

Trijicon Tritium Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate up to 15 years.

True-Color 28 Layer Coated Lens

Creates a wide-band light transmission for minimal change in target area color.

Adjustable Windage

Easily adjustable with out special tools. 1 MOA per click.

7075-T6 Military-Grade Aluminum Alloy Housing

For extreme durability.

Lifetime Warranty

Backed by Trijicon quality and service.

Waterproof

Completely waterproof to a depth of 66 feet/20 meters.

RMR Dual-Illuminated
