

"My life has depended upon my being able to accurately fire my weapon in almost total darkness. Not having to worry about seeing the 'dot' is a benefit only appreciated by those of us who have been in a no/low light altercation. Thank you."

M. Sanders

Trijicon Reflex Series

When you're in the field, it's you, your weapon and your Reflex. The Trijicon Reflex helps you quickly engage and lock onto moving targets, providing speed and precision for critical situations. And the new RX30 provides for an even wider peripheral view. It's the precise advantage you need.

AGILE

Dual illuminated and parallax free, Trijicon Reflex offers increased field-of-view capabilities that provide fast both-eyes-open target acquisition and accurate aiming for the military, law enforcement and hunting enthusiasts.

New to the line is the RX30 Reflex sight that features a 42mm, clear-aperture lens for a generous field-of-view and the largest sight picture possible. It allows you to move the firearm freely and remain on target at multiple shooting angles when surveying an area. As a result,

the Reflex is considered by many marksmen to be the fastest and most user-friendly sight in the field — any field.

Allowing accurate both-eyes-open shooting that expands peripheral view, this advanced sight provides a critical advantage when you're aiming on the move, in low-light situations, or even in darkness.

VERSATILE

With the Reflex, a glowing tritium lamp ensures a bright amber reticle at night or in low-light conditions, while advanced fiber optics deliver ambient light to the aiming point during the day. A true-color, multi-layer dichroic-mirrored lens delivers wide-band light transmission for minimal change in target-area color.

And, adjustments for windage and elevation further improve accuracy.

Reflex is available with four reticle options to match your shooting requirements: one triangle, one chevron and two different size dots.

DEPENDABLE

Nearly indestructible, the Reflex features a military grade housing that's investment cast from aircraft aluminum alloy and hard-coat anodized. Tested to military standards, the sight stands up to, and performs under, the most extreme environmental conditions. Batteries? None needed; it's totally battery free.

With performance and reliability like this, it's no wonder the Reflex was selected for the SOPMOD M4 Accessory Kit fielded by all U.S. Special Operations forces.

Reflex – The Fastest, Most User-friendly Sight in the Field

Dual illuminated and parallax free, the Trijicon® Reflex sight was designed for close quarter battles and is unrivaled in both speed of target acquisition and pinpoint accuracy.

The Trijicon Reflex allows soldiers, law enforcement officers and hunters to shoot with both eyes open – a critical advantage for those who must aim while moving, or in darkness.

Accuracy is enhanced with its dual-illuminated reticle. A glowing tritium lamp ensures a bright amber reticle at night or in low-light conditions, while advanced fiber optics deliver ambient light to the aiming point during the day. Batteries are not required.

Adjustable Elevation

Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the reticles to available light conditions.

Military-Grade Aluminum Alloy Housing

Investment Cast aircraft aluminum alloy housing provides for a nearly indestructible sighting system.

Adjustable Windage

 Proudly Made in the U.S.A.

Trijicon Tritium Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate up to 15 years.

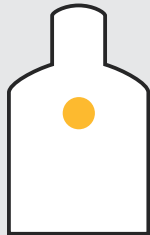

Trijicon Reflex Provides a

True-Color 28 Layer Coated Lens
Creates wide-band light transmission for minimal change in target area color.

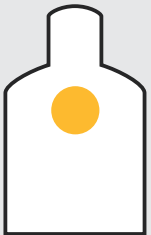

Model RX30

Trijicon® Reflex Reticle Options:

Triangle, Chevron and two different Dots – to match your specific shooting requirements.

RX30	42mm Reflex Amber 6.5 MOA Dot Reticle (without mount)
RX30-11	RX30 with Weaver Mount
RX30-14	RX30 with Flattop Mount
RX30-17	RX30 with H&K Mount
RX30-23	RX30 with A.R.M.S.® #15 Throw Lever Flattop Mount
RX30-25	RX30 with M16 / AR15 Top of Handle Mount
RX30A-51	RX30A with TA51 Flattop Mount

*In addition to fiber optics and tritium, the Reflex RX09 also allows the use of Cyalume® chemical light stick as a third lighting source. A Cyalume® chemical light stick helps avoid the reticle washout sometimes caused by a sudden burst of bright light.

I thank you all for your consideration in making my hunt very successful. It has worked flawlessly in bright sun light or on dark cloudy days. I took another turkey yesterday with it. Thanks again.
